CHERC

Cultural Heritage and Educational Research Center

It was made possible through the invaluable support of the Commission on Higher Education (CHED) which aims to promote and preserve the rich cultural heritage of the Ilonggos while providing a platform for educational research and innovation. The center will serve as a hub for students, faculty, and researchers to collaborate and explore various aspects of the Ilonggo history and cultural heritage and research.

HYBRID SOLAR DEHYDRATOR MACHINE

A research project led by Dr. Renerio Mucas, the machine dehydrates crops and food materials by collecting solar heat via heat catchers installed outdoors and concentrating the energy into a drying chamber.

This innovation won 2nd place in the Agriculture, Aquatic and Natural Resources Category during the 1st Idlab Awards of the Department of Science and Technology Region VI (DOST 6).

Regional Yarn Production and Innovation Center (RYPIC)

is a joint project of ISAT U and DOST-PTRI for the revival of the native weaving industry with cultural, economic, environmental and tourism components. The 42 million facility now produces yarns from blends of natural fibers such as abaca and pineapple, combined with cotton to be used in weaving fabrics.

ISAT U Research Hub

ISAT U Research Hub Cantilever Beam- considered as one of the longest structures of a building in Western Visayas, the cantilever beam of the Research Hub measures 8.5m from its support. It was technically designed to cover and protect the porte cochere or the car port as well as the people approaching the entrance of the building especially during bad weather. Designed by Ar. Rony P. De Juan, a faculty of the College of Engineering and Architecture
